PERFECTION IN HOOKS

2018

Cultiva

LURES

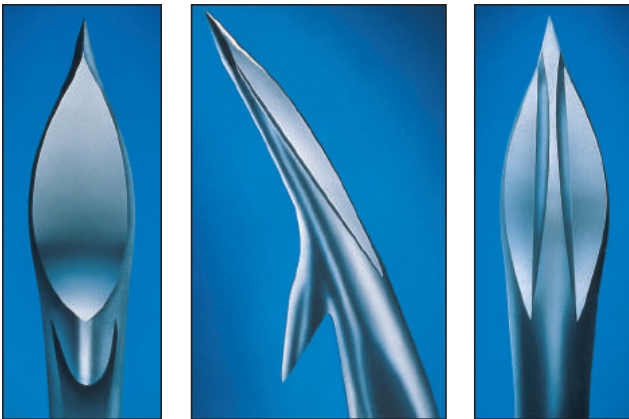

At Owner American Corporation, we have devoted nearly three decades of effort in developing a line of high quality, high performance fish hooks that, today, are second to none in popularity among both fresh and saltwater anglers. After the addition of Cultiva Lures to our product line, our company experienced the kind of phenomenal growth that forced us to expand into a larger facility in Costa Mesa, California — one where we continue us to better serve the needs of a continually expanding customer base. Satisfied, if not ecstatic customers have helped us come a long way. Their exciting catch results (visit our website and Instagram to view the “proof” in pictures), plus the huge successes of our tournament fishing pros, have kept our company inspired and motivated. That, coupled with the feedback from a growing number of avid fans, has helped us continue in the design and development of an ever-expanding line of hooks, lures and tackle accessories that we feel are the best they can be. We encourage you to look for Owner hooks at your favorite tackle retailer —

and if they don't yet carry our products, ask them if they would please do so. We also invite you to

visit our website at www.ownerhooks.com, where you'll find updates, educational videos, and a complete Owner online catalog.

OWNER'S EXCLUSIVE TRIPLE-EDGED CUTTING POINT®

CUTTING POINT® hooks, developed by the Owner Hook Company of Japan, are a revolutionary breakthrough in high technology hook design. Unique to each Owner CUTTING POINT® hook is the triple-edged cutting blade led by a needle-sharp point that never needs sharpening. The point grabs quickly, and as it begins to penetrate, the three cutting edges slice their way through the toughest scales, cartilage and even jawbones for a positive, effortless hook set.

Owner's unique triple-edged CUTTING POINTS® are engineered for better penetration. Conventional hooks are typically stamped to a pyramid point or ground to a pencil-type point, and by their design, encounter more friction and resistance the deeper they penetrate. With the CUTTING POINT's® triple-edged blade, the amount of resistance actually decreases as the hook penetrates. Prove it to yourself by pulling the CUTTING POINT® through a matchbook cover. The CUTTING POINT® grabs and slices quick and clean right through the material!

Caution: Owner CUTTING POINT® hooks are super sharp out of the package and do not need to be sharpened. Attempts to sharpen after purchase removes the finish and may weaken the tempering process, leading to rapid corrosion and soft points.

BLACK CHROME FINISH — Saltwater live bait fishermen prefer dark finish hooks because they are less visible than “bright” hooks and make for a more natural bait presentation. Many of Owner's CUTTING POINT® hooks feature a dark, durable Black Chrome finish that not only encourages more strikes from wary gamefish, but is highly resistant to saltwater corrosion, thus extending the life of the hook.

OWNER HOOKS FISHING SCHOOLS

Host Sergio Fainzstein Is School's Leading Educator

Owner Hooks has teamed up with Angler Chronicles to continue the legacy of the very popular “On-The-Water” Fishing Schools. This successful program began in 1989 and has graduated over 40,000 student anglers. Combining on-deck seminars with hands-on instruction from highly experienced instructors, the Owner Hooks Fishing Schools are committed to sharing the needed skills sets with recreational fishermen, from beginners to advanced. The Owner Hooks Fishing Schools are conducted aboard “Limited-Load” charter boats departing from most of the landings in Southern California. The school's team of instructors is led by Sergio Fainzstein, host of the Angler Chronicles TV Show and the Angler Chronicles Radio Show. Sergio, co-director Ron Hobbs, and the entire Angler Chronicles crew are eager to share their knowledge and passion for fishing.

For more information about Owner Hooks On-The-Water Fishing Schools, plus Sergio Fainzstein's Anglers Chronicles television series and weekly radio show — all sponsored in part by Owner Hooks — log on to the website shown below.

www.anglerschronicles.com

TV and radio host and expert angler Sergio Fainzstein and his veteran team of instructors are always eager to offer their expertise in conducting Owner Hooks “on-the-water” Fishing Schools.

Professional Fishing Guides Depend On Owner Hooks!

There are no truer testimonials or credible product tests than those coming from professional guides who depend on their success to make a living.

"Since I make my living as a professional guide, I believe in using the highest quality gear available. That's why I use Owner hooks. They are the sharpest and strongest hooks I have ever used and, most importantly, they help my clients catch more fish. Use Owner hooks once and they sell themselves."

"I use Owner hooks because they are the sharpest, strongest and best quality hooks available — and because they help me land more and bigger fish."

Terry Mulkey

Veteran Pacific Northwest Salmon and Steelhead guide

Jordan Lee

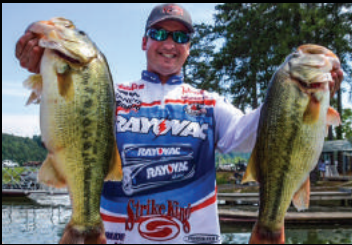

2017 Bassmaster Classic Champion.

OWNER BASS FISHING TOURNAMENT PRO STAFFERS

Owner's team of tournament bass fishing professionals continues to grow with each passing year. These highly accomplished anglers and guides depend on Owner hooks for their successes, and continuously provide valuable input for our product development.

BASS HOOKS

TwistLOCK®

Owner's revolutionary new TwistLOCK® with unique Centering-Pin Spring (U. S. patent # 7,841,127) is a highly functional hook feature that allows for permanent "No-Slip" rigging of soft plastics by screwing the nose of the bait onto the unique TwistLOCK® coil spring (CPS) before positioning the hook point.

U. S. Patent No. 7,841,127

Colorado FLASHY SWIMMER™

4164

Willowleaf FLASHY SWIMMER™

5164

Molded Weight With Spinner Blade Attached Makes These Hooks Deadly When Rigged With Swimbaits.

NEW!

Available in models that feature Owner's 5130 BEAST Hook with TwistLOCK®.

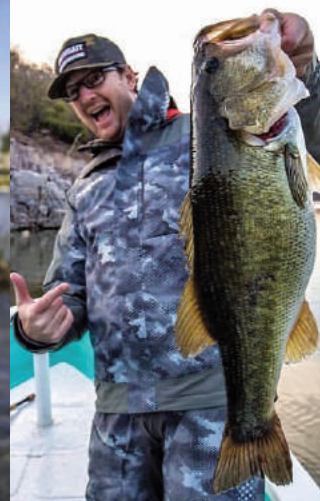

4164 Colorado FLASHY SWIMMER with TwistLOCK® Centering-Pin Spring (CPS) is a unique hook for rigging soft swimbaits, flukes and other swimming plastics. The spinner blade is attached to a non-movable weight that keeps a rigged soft plastic perfectly for use as an ideal "search" bait that can be fished in spinnerbait fashion. The added weight helps to sink or "swim" the rigged bait down into the strike zone, while the blade adds a fish-attracting flash. The wire pivots where attached to the weight, but the design of the molded lead keeps the wire and blade riding horizontal during a steady retrieve. Attached to the wire is a golden brass-finished Colorado blade, rigged with a dual mini swivel. Other features include a TwistLOCK® "Centering Pin Spring" (patented) attached to the hook eye, an "open" gap for more positive hook sets, a XX-strong forged shank, Super Needle Point, and black chrome finish. One of these new models features Owner's 5130 BEAST Hook with TwistLOCK® "Centering-Pin Spring." (Pocket packs only)

5164 Willowleaf FLASHY SWIMMER with TwistLOCK® Centering-Pin Spring (CPS) has all of the same applications and great features as our 4164 Flashy Swimmer, except that it's instead rigged with a #3 hammered nickel-finished willowleaf blade. Included is a TwistLOCK® "Centering Pin Spring" (patented) attached to the hook eye. Also available are three models featuring Owner's 5130 BEAST Hook. (Pocket packs only)

11757

Practically weightless and super sharp, it's ideal for rigging finesse baits.

11757 TwistLOCK® FINESSE with Centering-Pin Spring (CPS)

is practically weightless and gives "sticky sharp" a whole new meaning. With Owner's unique TwistLOCK® "Centering-Pin Spring" (patented) attached to the hook eye, baits can be permanently secured by inserting the pin in the center of the nose of a soft plastic, which can then be screwed onto the TwistLOCK® coil spring so that any bait will rig perfectly straight everytime! For bass fishermen, this hook is ideal for fishing with finesse style baits on lines of up to 10-lb. test. Features include a Super Needle Point and black chrome finish. (Pocket packs only)

5168

Featuring **ZOWIRE**
Owner's super-strong, fine diameter Zō Wire™, plus a unique Silky Gray frictionless finish, improve hook penetration.

5168 TwistLOCK® FLIPPING with Centering-Pin Spring (CPS)

is revolutionary in the "flipping hook" category. While traditional flipping hooks have straight shanks and require tedious methods of securing bait heads to the shank, the TFH, with its Centering-Pin Spring (patented), allows soft plastics to be rigged quickly and perfectly straight with no extra modifications needed. This hook also features Owner's new Zō Wire™, which is stronger than other traditional high carbon steel wires and will stand up to the heaviest braided lines and the biggest fish. This means smaller hook wire diameters for better penetration and a Super Needle Point that will not roll over or dull. Also featured on TFH is Owner's Silky Gray frictionless finish that encourages superior hook penetration and helps with bait clearance on hooksets. (Pocket packs only)

5130

"Maximum" hook gap allows for improved hook sets because of better bait clearance.

with

TwistLOCK®

5130W

Contoured, non-movable weight provides a "keel" effect, so rigged baits swim naturally.

Stinger Harness Rig

Perfect for use with our Weighted BEAST Hook to help eliminate short strikes.

see page 39

5130 BEAST with TwistLOCK® Centering-Pin Spring (CPS)

is designed for weedless-style rigging of larger plastics like big swimbaits, flukes, tubes and creature baits. With its TwistLOCK® "Centering-Pin Spring" (patented) attached to the hook eye, baits can be "permanently" secured by inserting the pin in the center of the nose of a soft plastic, which can then be screwed onto the TwistLOCK® coil spring to rig perfect everytime! Quick-drop shank below eye allows for rigging fat-headed baits, and "maximum gap" allows for improved hook sets because of better bait clearance. Features include a XXX-strong forged shank, Super Needle Point, and black chrome finish. (Pocket packs only)

5130-221	12/0	2	10	54831-01018	\$11.50

5130W Weighted BEAST with TwistLOCK® Centering-Pin Spring (CPS)

is the same hook as our 5130, only with a non-movable weight attached. This not only helps to sink or "swim" a rigged bait down into the strike zone, but because the weight is positioned so low on the shank, it provides a "keel" effect. As a result, when rigging large swimbaits weedless-style, plastics swim naturally (as opposed to rolling or flipping where weights are inserted inside soft baits). Ideal for both fresh and saltwater fishing, features include a TwistLOCK® "Centering-Pin Spring" (patented) attached to the hook eye, "maximum" gap, a XXX-strong forged shank, Super Needle Point, and black chrome finish. (Pocket packs only)

WIDE GAP-PLUS®

5139

5339

Super Wide Gap Is Perfect For Weedless Rigging Tube Baits And Extra Beefy Soft Plastics!

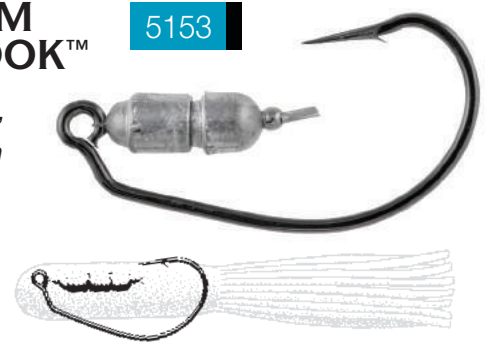

5139 WIDE GAP-PLUS®, with its deep throat and dramatically elevated point, offers an extraordinarily wide gap for EXTRA hooking power. Unlike other "wide gap" hooks, where the point is directly in line with the eye, this point rides *above* the eye level, providing an EXTRA wide gap "plus" for a more positive and effective hook set. Features a XXX-strong forged shank, a bait-holding Z-Lock shoulder bend, Cutting Point® and black chrome finish. (Pocket packs and pro packs)

PHANTOM TUBE HOOK™

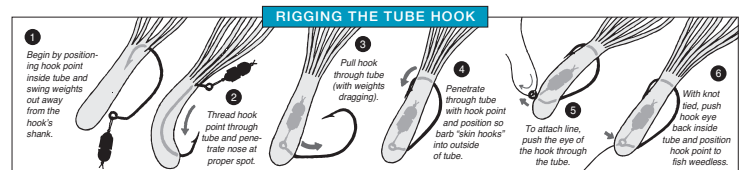

5153

Unique "Flexible" Weighted System Is Specifically Designed For Rigging Tube Baits Weedless!

5153 PHANTOM TUBE HOOK™ features a unique weighted system designed specifically for rigging tube baits weedless (see below). Unlike rigs where weights are positioned along the shank of the hook, the Phantom Tube Hook allows for placing the weight "inside" the tube. This way, when a bass strikes, it feels only the soft, natural textures of the tube, so it is less likely to drop the bait. Features include a 45° eye bend, short shank, huge wide bite, Cutting Point® and a black chrome finish. (Pocket packs only)

COVER SHOT Hook

4107

Light line hook with monofilament keeper to secure baits.

NEW!

4107 COVER SHOT Hook is a light finesse style hook for rigging small worms and baits. Typically used for drop-shotting, the hooks are made from fine wire for easy hooksets with light lines. The monofilament bait-keeper allows soft, supple baits to be threaded over it without damage. The keeper is meticulously wrapped onto the shank to prevent it from sliding or spinning. Features include a Super Needle Point and Silky Gray frictionless finish. (Pocket packs only)

JUNGLE WIDE GAP Hook

4108

Our strongest hook for use with braided lines and big baits.

NEW!

4108 JUNGLE WIDE GAP Hook, 4X-strong and designed for use with heavy braided lines and big baits, it's made from Zō Wire™, which is stronger than traditional high carbon steel wires. With the point riding slightly above the eye, this is a true weedless hook which can be rigged with Flipping baits, swimbaits and more. Other features include a forged shank for added strength, plus a Silky Gray frictionless finish that encourages superior hook penetration. (Pocket packs only)

Owner's super-strong, fine diameter Zō Wire™, coupled with a unique Silky Gray frictionless finish, improves hook point penetration!

Owner's exclusive Zō Wire™, stronger than traditional high carbon steel wires, will withstand the heaviest braided lines and the biggest fish. Smaller diameter hook wire when combined with Owner's exclusive Silky Gray finish means superior hook point penetration.

JUNGLE FLIPPING HOOK

4100

Featuring

With closed eye for use with heavy braided line.

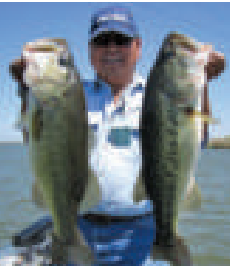

4100 JUNGLE FLIPPING HOOK, 4X-strong with closed eye, will withstand heavy braided line use in the toughest of conditions. Made with Zō Wire™, which is stronger than other traditional high carbon steel wires. The bait keeper is meticulously wrapped onto the shank to prevent the keeper from sliding or spinning. Also featured is Owner's Silky Gray frictionless finish that encourages superior hook penetration. (Pocket packs only)

WACKY HOOKS

5172 WACKY HOOKS, available with or without a weed-guard, are the perfect hook for down-shottin' and drop-shottin' natural baits and soft plastics for suspended bass and panfish. The hook gap's sharp-angle bend serves as a "saddle" that encourages a worm rigged at the middle to seek an "optimum" position for an enticing horizontal presentation, which makes this an ideal hook for "wacky wormin'." Models with a Flex Nylon "weedless" guard are the choice for wormin' in heavy cover. Both models feature a Super Needle Point and camo green finish. (Pocket packs only)

5172

Flex Nylon
"WEEDLESS"
Guards

With Or Without Weed Guards, They're Ideal For Down-Shottin' And Drop-Shottin' Natural Baits Or Soft Plastics When Fishing For Bass Or Panfish.

DOWN SHOT™ Offset Hook

5133 DOWN SHOT™ OFFSET HOOK, with its eye in a "down" position, is ideal for the down shot fishing system, as it's engineered to ride perfectly horizontal when tied into a line that is to be fished straight up and down. Use a Palomar knot, but pull tag end of line up, over and through the hook's eye one additional time before attaching sinker. Rig any kind of soft plastic bait and use as a deadly presentation for suspended game fish. Light wire, forged shank, and includes a 90° shoulder bend, Cutting Point® and black chrome finish. (Pocket packs only)

5133

5333

"Down" position of the eye encourages the hook to ride horizontal when rigged with a soft plastic bait.

5155

DOWN SHOT™ SINKERS

5155 DOWN SHOT™ SINKERS, small and light weight, are bell-shaped and just right for use with the down shot system. The unique eye "pinches" on the end of the line — making the sinker quick to rig — and, should you hang up on the bottom (while hooked up to a fish or otherwise), the eye allows you to pull back and quick-release from the snagged sinker with ease. The two largest models have an internal swivel attached to the eye. (Pocket packs only)

DOUBLE "FROG" HOOK

5671

Super Sharp
And 3X-Strong
Replacement Hooks
For Frog Baits!

5671 DOUBLE "FROG" HOOK, with 3X-strong shanks and super sharp points, allows for easier hookups and more leverage in pulling big bass from heavy cover. They will quickly and easily replace inferior hooks typically found on factory-rigged frog baits. Also popular is using these hooks for light saltwater trolling and as a belly hook for big swimbaits. Features include Super Needle Points and a corrosion-resistant black chrome finish. (Pocket packs only)

Revolutionary
"Snagless" Rig For
Fishing Soft Plastics
Along The Bottom!

Owner's unique JigRig™ (patent pending) is the ultimate for fishing soft plastic baits along the bottom. The slim-profile weight, with free-floating hook, casts like a bullet, then drops straight down, even through vegetation, and makes for a tantalizing and snagless presentation along hard-to-fish bottoms.

Jig Rig™

Hook is free-floating for a wide range of bait movement.

Compact casting profile for longer, more accurate casts.

Sinks straight, with weight always leading hook. Perfect for penetrating vegetation.

Unlike typical jigs, the JigRig™ hook moves independent of the weight, allowing rigged baits more freedom of movement.

5122 5117

Weights can easily be removed and added to the split ring without re-tying your line or re-rigging baits.

5122 JIG RIG™ is the ultimate for fishing soft plastic baits along the bottom. The slim-profile weight, with bait in tow, drops straight down, penetrating vegetation until you feel it hit bottom. Then, as you slowly retrieve the snagless rig over bottom contours, your bait, rigged on a hook that pivots independent of the weight, freely moves about. With the weight leading the way, the compact profile of this rig allows for longer, more accurate casts. Perfect for Texas Rig'N, the light wire hook (attached to a solid ring) features an extra wide gap, Z-lock shoulder bend, Super Needle Point, and a black chrome finish. Rig is available with either a lead or tungsten weight attached. (Pocket packs only)

TwistLOCK®

5199

Snagless sinker allows for a better feel of bottom contours and a more effective presentation of soft baits.

5199 TwistLOCK® JIG RIG™ combines two unique Owner concepts. Adding to the many attributes of the JigRig™ is Owner's unique "Centering-Pin Spring (CPS - U.S. patent # 7,841,127). With the CPS attached to the eye of the JigRig™ hook, baits can be "permanently" secured by inserting the pin in the center of the nose of a soft plastic, which can then be screwed onto the TwistLOCK® coil spring so that any bait will rig perfectly everytime! The specially designed hook for this rig features a cross eye (to accommodate the CPS) with a 30° eye bend, a 3X-strong forged shank, Super Needle Point, and a black chrome finish. (Pocket packs only)

4104/4103 ULTRAHEAD™ - Pivot Head.

Rig on swimbaits and fish individually or in multiples on umbrella rigs. The split ring joint between the "bean" shaped head and hook create an erratic swim pattern that drives fish crazy. The "weedless" version is designed to be Texas rigged with the hook point riding on the top of a bait. When fishing in open water conditions, the "straight" shank version can be used for higher hook-up rates. Heads have a black matte finish and the hooks are black chrome. (Pocket packs only)

**MOSQUITO™
HOOK**

5177 5377

5177 MOSQUITO™ HOOK is a favorite when using the drop-shotting method for bass, walleye and panfish. For light line use, it is self-setting and perfect for windy conditions or turbulent water where it is difficult to keep a tight line. Ideal for rigging small live baits, for nose-hooking soft plastics, and for “wacky wormin’.” Featured is a fine-wire forged shank with offset Super Needle Point. Available in both a black chrome finish (pocket packs and pro packs) and a “red” finish (pocket packs only) in selected sizes.

BARBLESS NO ESCAPE

4106 BARBLESS NO ESCAPE™

is a "factory" barbless hook that complies with all "barbless" regulations. Hook shape is very similar to the traditional octopus design, but incorporates a "V" bend deep in the gap, which helps assure that once fish get hooked, they stay hooked. A slightly up eye allows the hook to be threaded through a bait with minimal damage. Features include a forged shank. Available in black chrome or red finishes. (Pocket packs and pro packs)

SIDE-DRIFTING HOOKS For Steelhead

Designed for side-drifting techniques in rivers and streams for trout and steelhead, these light weight hooks allow for a more "natural" presentation. Offset points improve hook-up ratios, and fine-wire forged shanks made from high carbon steel offer incredible strength.

SIDE-DRIFTING SSW™ Hook

5315SD

5315SD SIDE-DRIFTING SSW™
Up-eye design is ideal for snelling. Withstands heavier lines and stronger currents. Features include a Super Needle Point and black chrome or red finish. (Pro packs only)

HERRING HOOK MOSQUITO™

5377HH

In-line design makes it easier to thread the hook through a herring for a more "natural" presentation

5377HH HERRING HOOK - MOSQUITO™
Made from high carbon steel wire, they are designed to be light and sharp for a "natural" bait presentation and instant penetration. The offset point helps improve hook up ratios and the forged design help make these hooks incredibly strong relative to the wire diameter. With eyes more in-line with the shank than most typical octopus style hooks, these hooks can be threaded through herring with minimal damage to the bait. Features include a Super Needle Point and black chrome finish. (Pro packs only)

ST-36 TREBLE™

5636 5836

ST-36 TREBLES™ are ideal for both fresh and inshore salt water — either as replacement hooks for smaller profile lures or as a “stinger” when bait fishing. Features include round bends, plus straight Super Needle Points for wide-gap hooking efficiency. All sizes with black chrome finishes are available in pocket packs, while five sizes are now available in pro packs. Three sizes are available with a red finish, ideal for baiting salmon eggs or roe berries for trout and steelhead. (Pocket packs only)

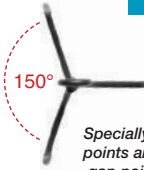

BALANCED HOOKING POWER

When rigged on a popper or crankbait, Owner trebles, unlike other treble hooks... ..are positioned for balance, side-to-side, which helps lure performance.

SHORT SHANK TREBLE

5635

Specially designed so that two hook points are split apart by 150°. Wide gap points positioned to either side of lure will improve hookup ratio.

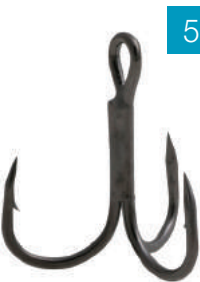

5635 SHORT SHANK WIDE GAP TREBLES, are similar to our ST-36 series but with a short shank and wider gaps. Shorter shanks allow wider-gapped hooks to be used without the fear of multiple trebles on the same lure fouling each other. Also, by their nature, short shanks flex less. This treble also features 150° PPP (Premium Point Position — see illustration) that splits two hook points apart by 150°, versus the typical 120° split between all three points. Opening this gap allows the hook points to be positioned slightly farther out from the hardbait body, encouraging hookups that otherwise might not happen — and resulting in less hook damage to the lure. Features include Owner’s Silky Gray frictionless finish (which encourages superior hook penetration through gill plates and toughest parts of the mouth), round bends, and Super Needle Points. Note: When rigging hardbaits, always position the front treble with the single hook facing forward and the rear single facing to the back. (Pocket packs only)

TREBLE HOOKS

NEW! **5638** **STX-38 TREBLE™**

Featuring
ZōWire

5645 **STX-45 TREBLE™** **NEW!**

STX-38 TREBLES™ are X+ strong, yet weigh the same as the ST-36. Made from Owner's Zō Wire™, so the points are slightly harder and hold up longer. Perfect as replacements for inferior "factory" trebles found on many brands of plugs and spoons used for trout, bass, and many inshore species. Features include forged shanks, Super Needle Points, and a corrosion-resistant "shadow finish." (Pocket packs only)

STX-45 TREBLES™ are XX+ strong, but weigh the same as the ST-41, can be used as a stronger replacement. Made from Owner's Zō Wire™, which means stronger, yet lighter wire for superior hook penetration. Points feature a "V" deep in the gaps that encourage fish to stay hooked. Forged shanks, Super Needle Points and a corrosion-resistant "shadow finish." (Pocket packs only)

Tournament TRAILERS™

They Trigger An "Attack" Response From Gamefish!

Featuring Owner's Stinger® Treble hook, but with feathers and reflective mylar flash hand-tied around the shank to stimulate more strikes. When pulled behind a crankbait or spoon, the feathers undulate like the tail of a minnow, but stop the lure and the feathers spread, triggering an "attack" response from aggressive game fish. Hook features include Super Needle Point and a red or black chrome finish. **Available feather colors:** (01) White Flash, (03) White/Chartreuse Flash, (04) White/Red Flash, (08) Nightmare Black.

STX-68 TREBLE™

5668

STX-68 TREBLES™, 4X+ strong and made from Zō Wire™, are every bit as tough as our ST-76. Perfect as replacement upgrades for large surface poppers, trolling baits, and jigs. Features include forged shanks and a corrosion-resistant vacuum-tinned finish. As with all Owner trebles, the STX-68 is made from 3 separate pieces of wire for perfect balance that allows baits to run true. (Pocket packs only)

ZōWire Stronger and sharper, with a finer diameter.

SINGLE REPLACEMENT HOOKS

4101

X-STRONG

**Sharper!
Stronger!
Safer!**

4102

3X-STRONG

Featuring
ZōWire

Owner's super-strong, fine diameter Zō Wire™, plus a unique Silky Gray frictionless finish, improve hook penetration.

4101 SINGLE REPLACEMENT HOOK, X-STRONG.

Perfect for replacing trebles on freshwater and inshore baits, especially when fishing in and around lots of grass or cover where using treble hooks can be virtually impossible. These single hooks are also a lot less damaging to fish when practicing catch-and-release. Always be sure to rig the front hook with the point facing forward and the rear hook with the point facing to the back. Features include a Super Needle Point and black chrome finish. (Pocket packs only)

4102 SINGLE REPLACEMENT HOOK, XXX-STRONG.

Ideal for replacing trebles on large saltwater baits. Made with Owner's exclusive Zō Wire™ — stronger than traditional high carbon steel wires, with a smaller diameter for better penetration of a Super Needle Point that will not roll over or dull. Safer than trebles for angler's handling big fish on deck. Built to handle large tuna and giant trevally. Features a vacuum-tinned finish for corrosion prevention. (Pocket packs only)

For saltwater anglers, MUTU™ Circle Hooks have become favorites for rigging both live and chunk baits. A key reason for the Mutu's popularity is that the precision engineered offset, "hangnail" point results in fish being jaw-hooked — not gut-hooked — a majority of the time. In fact, the fish usually hook themselves. Once a fish takes the bait, just kick the reel in gear and wind. Eventually the fish turns and the hook slides to the corner of the mouth, where it automatically locks around the jawbone.

MUTU™
Circle Hook

5163 5363

5163 MUTU™ Circle Hook, with a strong wire shank, encourages larger rigged live baits like sardines to swim with authority. Features include a super-sharp, forged "hangnail" point and a corrosion-resistant black chrome finish. (Pocket packs and pro packs)

MUTU HYBRID™
Circle Hook

NEW! 4174

4174 MUTU™ HYBRID Circle Hook, with an offset point, is lighter than the Mutu but heavier than the Mutu Light. It's strong enough to hold big fish, yet light enough to allow small rigged baits like sardines to swim effectively. Features include a super-sharp, forged "hangnail" point and a corrosion-resistant black chrome finish. (Pocket packs only)

TROLLING JOBU® with RUSTOP™

5134 TROLLING JOBU® is the ultimate trolling hook for big game fishing. Many fishermen have used stainless hooks for trolling due to corrosion resistance. High Carbon hooks are superior in all other ways, including strength by diameter, which means better hook up ratios due to smaller wire diameters. The Trolling Jobu® includes Rustop™ attached to its shank, which acts as a sacrificial anode to attract corrosion away from points and other areas. Rustop™ extends the life of high carbon hooks up to 75%, allowing anglers to troll for days with the same hook. Unlike stainless hooks, the Trolling Jobu® will eventually "rust out", improving fish mortality rates. Features include a Cutting Point® and a corrosion-resistant vacuum-tinned finish. (Pocket packs and 100 packs)

5134

w/Rustop™

Rustop™ strip around shank prevents hook corrosion!

RINGED Bait Hooks

Hooks Are Stronger, And Baits Swim More Naturally

RINGED BAIT HOOKS, available in selected sizes of five of Owner's most popular saltwater hooks, feature super strong, stainless welded rings that create a pivot point in the eye of each hook. This not only allows rigged live baits to swim more naturally, but with the force of a direct pull, the ring actually reduces stress on the hook, making the overall unit stronger. And, because the ring will pivot as you fight an active fish, you can continually apply pressure from the same direction so you don't wear a large hole in the fish's mouth. (Pocket packs and pro packs)

**STINGER®
SIWASH Hook**

5171

5171 STINGER® SIWASH Hook, with an open-eye, is the ideal replacement hook for Northwest and Great Lakes salmon anglers anxious to change-out trebles on trolling lures. Also a terrific replacement hook for striped bass plugs and heavy-metal spoons and jigs. Dual-tempering process achieves maximum hook strength, yet still allows the eye to be closed. Features a XXX-strong shank, deep-throat gap, Super Needle Point, and a black chrome finish. (Pocket packs only)

Open-eye makes it easy to attach hook to lure before crimping eye shut.

AKI TWIST™ Hook

5169

5169 AKI TWIST™ Hook, with a heavy duty forged shank and offset reversed-bend Cutting Point®, is the ideal hook for live-baiting king size saltwater game fish with heavier lines. Features include a straight eye and black chrome finish. They rate 2X, 3X or 4X strong, depending on hook size. (Pocket packs only)

**Saltwater
DOUBLE HOOK**

5642

Replacement Hook for Shimano® Waxwing™ Lure

5642 Saltwater DOUBLE HOOK, 3X strong and super sharp, is designed for a variety of blue water applications, including use as a replacement hook for jigs and plugs — and the hook that comes rigged on all Shimano® Waxwing™ lures. Unlike trebles, double hooks can be quickly rigged onto a lure without a split ring. Features include forged shank, high-deep gaps for less flex during hook sets, Super Needle Points, and a vacuum-tinned, corrosion-resistant finish. (Pocket packs only)

K-HOOK

5173

Features A Traditional "Extra Wide Gap" Live Bait Hook Design, Ideal For Both Fresh And Salt Water Applications.

5173 "K" HOOK, fashioned similar to a Kahle live bait hook, popular in salt water for rigging shrimp, crabs and inshore baitfish, and in fresh water for baiting shiners and crawdads, as well as catfish stink baits on trotlines. Features a Super Needle Point (aimed at the hook eye for quick penetration), extra wide gap, and black chrome finish. (Pocket packs only)

INSHORE SLAM™ K-HOOK

Strong Yet Light Weight For A More "Natural" Live Bait Presentation.

5373IS

5373IS INSHORE SLAM™ Hook, made from high carbon steel, is strong yet light weight for a more "natural" presentation, plus instant penetration. Versatile, use them for rigging live baits like croaker, piggy perch, mullet, shad, shrimp, and other naturals. Features a Super Needle Point, extra wide gap, and a black chrome finish. (Pro packs only)

SSW™ UP-EYE Circle Hook

5178 SSW™ UP-EYE Circle Hook is distinguished not only by its up-eye design, which allows for snelling, but also for its slightly offset, super-sharp "hangnail" point and shank. Designed for presenting big baits with its big fish size, yet its all-purpose medium shank is light weight. Also featured is a corrosion-resistant black chrome finish. (Pocket packs and pro packs)

"LONGSHANKS"

5192

The perfect hook for rigging live, dead or artificial baits when trolling for billfish, wahoo, tuna, dolphinfish and king mackerel!

5192 LONGSHANKS are ideal for rigging ballyhoo when trolling for billfish, tuna, wahoo, dolphinfish and king mackerel — **no more missed hooksets due to short strikes!** Long shank also offers added protection when presenting baits to toothy critters like king mackerel and bluefish. Features include an extra-long, forged XXX-strong shank, Super Needle Point, and corrosion-resistant black chrome finish. (Pocket packs only)

DANCING STINGERS™

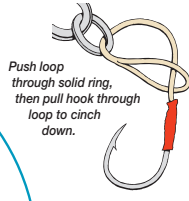

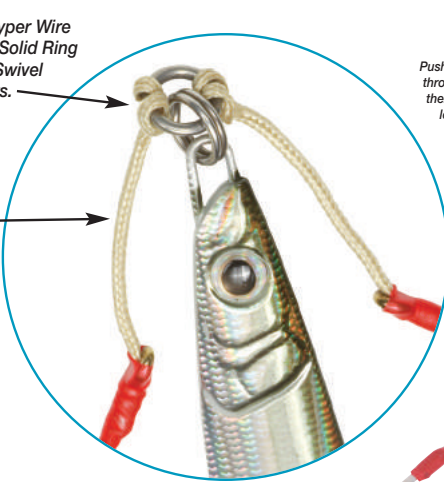

Use With Any Jig For Increased Hooking Power!

DANCING STINGERS™, attached to the eye of a jig, greatly increase hooking power. Because of the flexible Technora™ connections, fish can no longer leverage hooks and jigs out of their mouths. Super strong Technora™ loops attach to durable tinned Owner Super Needle Point hooks. Standard models are offered in four lengths (varying hook sizes). Also available are Monster versions for bigger fish, Sabiki stingers (pearlescent skin with multi-color foil strands), a Wire model for toothy game fish, and two special Dual Hook models, the larger versions rigged with Zō Wire™. Note: The hardness of Owner's Zō Wire™ keeps points sharper longer while hooks are banging against jigs. (Pocket packs only)

Attach Owner Hyper Wire Split-Ring, then Solid Ring or Ball Bearing Swivel with two Stingers.

Technora™ loops are three times stronger than monofilament of equal diameter.

Optional: Attach Stinger loops to "bottom" swivel ring and swivel ring to split-ring.

Designed for the SHIMANO® "Butterfly™" Jigging System.™ Also works great for other jigs!

*Shimano® and Butterfly™ are trademarks and registered trademarks of Shimano American Corporation and Shimano, Inc.

HYPER BALL BEARING SWIVELS

Our high-performance Ball Bearing Swivels feature welded stainless steel rings and a corrosion-resistant black chrome finish. To eliminate line twist, substitute swivels for solid rings (swivel #6 for solid ring #6.5; #7 for #7.5; #8 for #9) when attaching Dancing Stingers. (Pocket packs only)

OWNER SABIKI FISH CATCHERS

Multi-hook jigging rigs for catching mackerel, small jacks (*caballitos*), herring, smelt and other small baitfish. Rigs vary in length depending on number of hooks, but generally, 10 inches of main line stretches between 4-inch drop lines. Swivels attach at each end of rig. Jigs are either flashy skin-type, reflective foil and mylar, or small squid skirts as indicated below. Each rig has hooks in varying numbers (HKS) and sizes (SZ), plus varying strengths (lb.-test) of main line (ML) and branch lines (BL).

GOLD DANCING HOOK — Maximum flash, flat-sided gold hooks that dance down the water column; green and pink glow heads; color bead slides on each branch line; reflective multi-color foil strands; hooks dressed with metallic gold mylar.

SILVER RAINBOW SKIN — Nickel hooks; green glow bead slides on each branch line; hooks dressed with pearlescent skin.

MACKEREL FISH SKIN — Gold hooks; green glow heads; reflective multi-color foil strands; hooks dressed with mackerel skin.

SHRIMP SKIN — Gold hooks; hooks dressed with pink shrimp skin

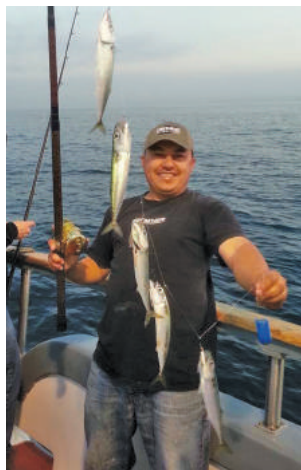

SQUID SKIRT — Nickel hooks; green glow bead slides on each branch line; pink, green glow, blue and silver squids; foil inside skirts.

WHITE HAGE FISH SKIN — Gold hooks; green glow heads; hooks dressed with white fish skin.

GOLD RAINBOW SKIN — Gold hooks; green glow heads; hooks dressed with pearlescent skin.

BLUERUNNER SQUID — Gold hooks; green, red and white glow squid skirts with reflective foil strands inside skirt.

CHUM BUCKET SABIKI — A unique concept developed in Japan. At the bottom of the rig is a plastic-molded chum bucket to hold finely cut baitfish, which allows for a “chumming” effect. Mixing sand with the chum bait helps extend diffusion time. Underneath the basket is a 1-oz. weight to keep the rig tauged and the five branch lines separated. At the end of each branch line are gold hooks dressed with pink shrimp skin. Branch lines range from shorter to longer as you progress up the main line above the chum bucket.

Featuring Low Visibility
FLUOROCARBON Leaders

5215

Snelled Eyeless
MUTU LIGHT
Circle Hook

Snelled Eyeless
SSW Hook With
Super Needle Point

GHOST LEADERS

GHOST LEADERS, featuring 18 inches of virtually invisible "fluorocarbon" connecting hook to swivel, are available in two different styles. Both ideal when rigging natural baits for finicky fish in clear, shallow water or over reefs and wrecks. Snelled at the end of the 5214 is an eyeless Mutu Light™ circle hook, and the 5215 features an eyeless SSW™ with Super Needle Point. All leaders include black chrome barrel swivels and hooks. (Pocket packs only)

Barrel Swivels allow for easy attachment to main line and help prevent line twists.

5125

5125 WALLEYE BAIT HOOKS, with hot glow beads (leader not included), are the ideal combination for baiting up and fishing dark water walleye. Featuring Owner SSW™ Super Needle Point hooks — in black or red — plus flexible hollow beads — glowing pale lime green or red. Beads slide up the shank (then can be positioned over the knot and the eye of the hook to function as an attractant) add buoyancy, and protect knots. (Pocket packs only)

WALLEYE CRAWLER RIG

Top Hook Is Adjustable For Customizing Leader Lengths

Features Two Owner "Walleye Plus" Hooks Snelled To A 6-Foot Leader

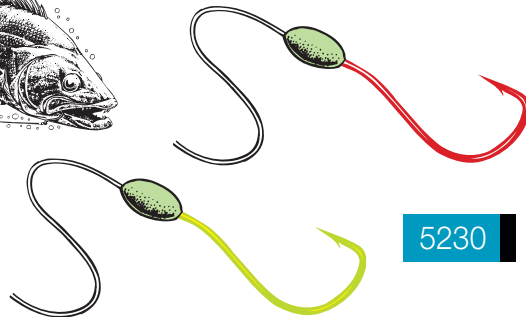

Shawn Rodgers photo

5212 WALLEYE CRAWLER RIG is deadly for presenting nightcrawlers and other natural baits to finicky walleyes. The leading hook is adjustable so rig can be customized for variable situations. Featured are two of our feather-lite, super sharp red "Walleye Plus" hooks snelled on a six-foot length of leader. The top hook is covered with a flexible plastic "glow" slider, snugged with a wrap of red thread, while the bottom hook's snell is concealed in a "green glow" bead, both to protect the knot and to serve as an additional attractor. (Pocket packs only)

Centering-Pin Springs

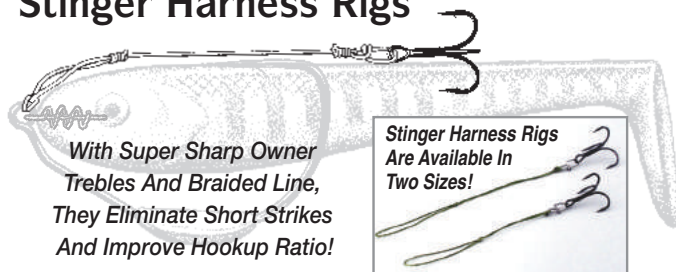

As featured on Owner TwistLOCK® hooks (pages 5 thru 7), our interchangeable stainless steel Centering-Pin Springs (CPS - U. S. patent # 7,841,127) attach to hook eyes, and allow any soft plastic bait to be "permanently" secured by inserting the pin in the center of the bait's nose and then screwing the bait onto the coil spring to rig perfectly everytime! The CPS has far superior holding power compared with barbed stick-pin holders. Three sizes allow for maximizing the holding strength for any size bait. (Pocket packs and pro packs)

NEW!

Stinger Harness Rigs

With Super Sharp Owner Trebles And Braided Line, They Eliminate Short Strikes And Improve Hookup Ratio!

The ultimate in a "stinger" harness rig, designed for use with both soft plastic and natural baits to eliminate short strikes and improve hookup ratio. Both models feature a length of super tough 80-lb. braided line, terminating at one end with a large loop and at the other with our EZ-Snap (dual interlocking), to which is attached an Owner ST-36 Treble hook. Simply pass the loop through the eye of any bait hook, then pass the treble through the loop and cinch the rig down against the eye for either a top side or under side rigging of the bait. The snap allows for a convenient change of the treble. (Pocket packs only)

Flashy Accent

The ideal accessory to compliment any freshwater or saltwater bait and hook presentation. Rig over a hook point and onto the shank to create additional flash with live or artificial baits. Texas rigs, Carolina rigs, wacky rigs, dropshot rigs — they will all attract more strikes with the Flashy Accent. Blades are nickel-plated (willowleafs have hammered finish and Indiana is smooth). Includes a black barrel swivel, plus a clear sheath skinned over the split ring eye that helps secure the Flashy Accent on hook shanks. (Pocket packs only)

INSTA-SWIVEL

An Amazing Swivel Design For Quick-Changing Lures!

Tie your line onto the eye-end of the Insta-Swivel, and with the nose-ring of your lure pressed against the swivel's cross-wire hook in the middle, simply twist the lure on and off. Lures will NOT come off when fighting a fish, yet can be easily twisted off by hand for a quick change. Features a double barrel swivel for extra smooth rotation and a black chrome finish. Available in four sizes. (Pocket packs only)

BUCKTAIL SHAD

4142

Available In Four Sizes!

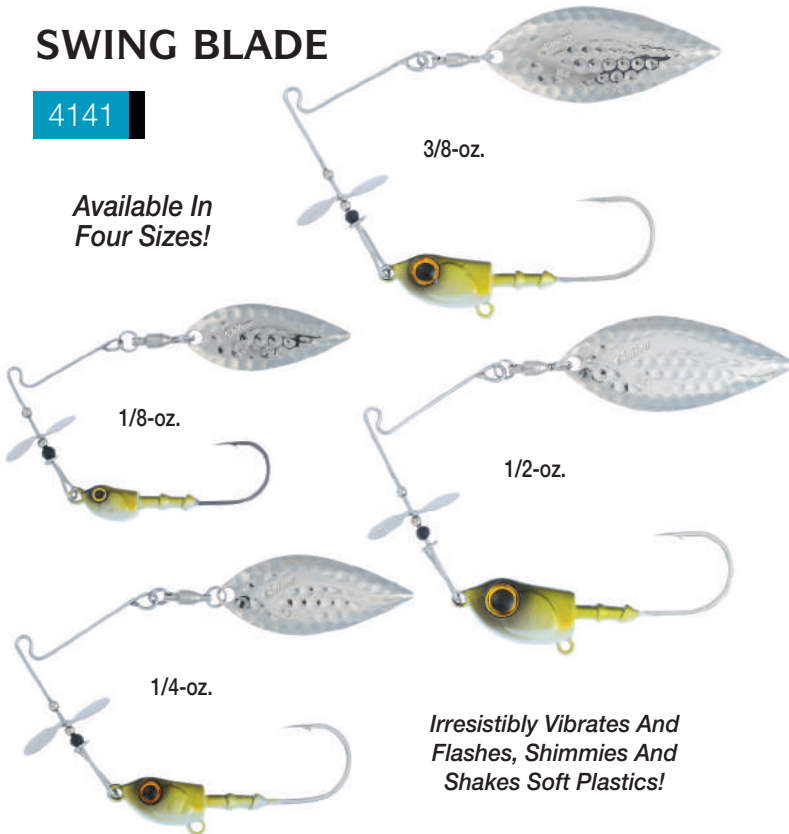

4142 BUCKTAIL SHAD, designed to mimic a struggling gizzard shad, is popular for bass fishing along ledges or in still water. Natural bucktail (for maximum buoyancy) is hand tied and finished with an epoxy to secure the wrap. Features include "living eyes," vertical line tie, and a Super Needle Point hook with black chrome finish. Designed by B.A.S.S. Elite Series veteran, Kota Kiriyaama.

SWING BLADE

4141

Available In Four Sizes!

Irresistibly Vibrates And Flashes, Shimmies And Shakes Soft Plastics!

4141 SWING BLADE, designed to be slow-rolled, features a propeller that "shimmies" in front of the bait. That, a flashing and vibrating hammered willow blade, plus a free-swinging jighead that gives life to any soft plastic, creates an enticing attractor that game fish can't resist. High carbon steel hook will stand up to salt water.

AKURO STRUCTURE JIG

4147

*Three Colors!
Three Sizes!*

4147 AKURO STRUCTURE JIG, compact and low profile, is for flipping and pitching. Small size is ideal for fishing clear and shallow water without spooking fish. Heavy weedguard allows for fishing the heaviest cover, while the Cutting Point hook assures reliable hook sets. Stainless steel "hook keeper" locks trailers and chunk baits in place. Available in three sizes and three different colors: (01) Red Craw, (03) Black Blue, and (04) Natural Shad.

SAKURA JIG

NEW!

(08) Gold

(13) Silver

(14) Red

Terrific Performers When Jigging In Deep Water For Bottom Fish!

Sakura Jigs are ideal for rockfish, flounder and a variety of other bottom fish. With a sleek profile, they typically get down in a hurry. For more current, use heavier models. Silicon skirts help entice fish in close, where the #9 and #11 hooks, made from Zo-Wire, finish the job. To rig, thread your line through the leadhead and then tie to the the ring attached to the hooks. Available in 60, 80, and 100-gram sizes in three different colors: (08) Gold, (13) Silver, and (14) Red.

Cultiva

PRODUCED BY OWNER

“AS GOOD AS THE HOOKS”

Cultiva® Lures are produced by Owner, and as we say, “they’re as good as the hooks!” This line of hardbaits, for both fresh and saltwater applications, features Owner Cutting Point® and Super Needle Point treble hooks, along with Cultiva’s exclusive “Living Eyes,” internal rattles and beautiful reflective, holograph and foil finishes. These lures are gorgeous, but also hard working and long lasting. The tantalizing actions will entice any fish to attack, and there’s no questioning the hooking power of those Owner trebles. See the following four pages for full details.

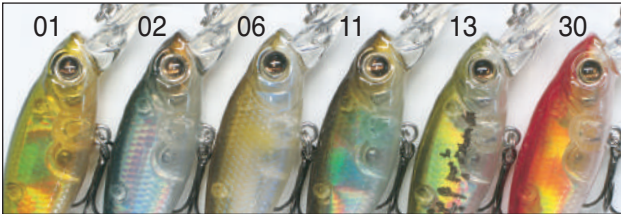

MIRA SHAD™

Our small, forage-size bait that is deadly for trout, bass, walleye and more. Dives when trolled or retrieved, or stop the retrieve and twitch or jerk the bait as it suspends. Features include Cultiva's exclusive "Living Eyes," chattering rattles, and a transparent, highly reflective holographic finish. Each lure is rigged with two #10 Owner ST-36 Super Needle Point treble hooks.

SONIC VIBRATION

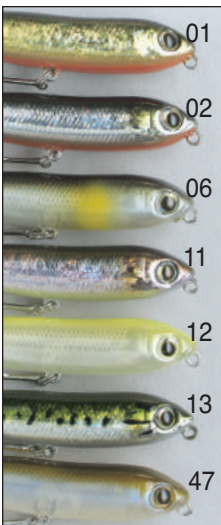

MIRA VIBE™

Our lipless, "super-sonic" crankbait that rides nose-down and vibrates and rattles with an enticing tight wiggle when retrieved or slow trolled. It casts like a bullet and has a classic baitfish profile, with lifelike features that include X-large "Living Eyes" and a fine scale, reflective finish, with color patterns that duplicate the look of small baitfish and juvenile game fish. Each lure is rigged with two #6 Owner ST-36 Super Needle Point treble hooks.
