

BOA RIG™

— WITH THE SECRET KNOT™ —

#5287

Patent Pending

Hook position is easily adjustable by pulling down on the **Secret Knot™** from above or pushing on it from below.

Adjustable hook locks in position when pressure is applied as hook is pulled downward.

Owner's **BOA RIG™** is a revolutionary two-hook bait fishing leader where the upper hook is easily "adjustable" to match the size of the bait, yet when the hook is set, will lock itself in place with the rig's magical **Secret Knot™**. Made from super strong Kevlar® cord, the patent-pending **Secret Knot™** responds by constricting tight around the main line when pressure is applied by a striking fish.
